Dokuwiki-template: Export Link in Pagetools

In order to have an export-link below the „Back to top"-link do the following:

- Add a new string (different from above) to `inc/lang/de/lang.php` (or whatever language you use):

  ```
  $lang['btn_export_pdf'] = 'Als PDF exportieren';
  ```

- Add the following line in `lib/tpl/dokuwiki/main.php`

  ```
  <!-- PAGE ACTIONS -->
              <div id="dokuwiki__pagetools">
                  <h3 class="a11y"><?php echo $lang['page_tools']; ?></h3>
                  <div class="tools">
                      <ul>
                          <?php
                              tpl_action('edit',       1, 'li', 0, '<span>', '</span>');
                              tpl_action('revert',      1, 'li', 0, '<span>', '</span>');
                              tpl_action('revisions',  1, 'li', 0, '<span>', '</span>');
                              tpl_action('backlink',   1, 'li', 0, '<span>', '</span>');
                              tpl_action('subscribe',  1, 'li', 0, '<span>', '</span>');
                              tpl_action('top',         1, 'li', 0, '<span>', '</span>');
                              tpl_action('export_pdf',1, 'li', 0, '<span>', '</span>');  <!-- insert
                          ?>
                      </ul>
                  </div>
              </div>
  ```

- Edit the function `tpl_get_action($type)` in file `inc/template.php` and add the following condition:

  ```
          case 'media':
              $params['ns'] = getNS($ID);
              break;
              case 'export_pdf':        <!-- inserted line -->
                      break;            <!-- inserted line -->
          default:
              return '[unknown %s type]';
              break;
      }
      return compact('accesskey', 'type', 'id', 'method', 'params');
  }
  ```

- Create two new `export_pdf` css-actions for the image in `lib/tpl/dokuwiki/css/pagetools.css` and add them at the end of the file

  ```
  #dokuwiki__pagetools ul li a.export_pdf {
      background-position: right -270px;
  }
  #dokuwiki__pagetools ul li a.export_pdf:hover,
  #dokuwiki__pagetools ul li a.export_pdf:active,
  #dokuwiki__pagetools ul li a.export_pdf:focus {
      background-position: right -315px;
  }
  ```
